

MISS CALLIE EDWARDS

Experience:

I've been on the RAD team as a committee member this year but would really like the opportunity to run RAD and improve it even more, I am a creative events management student and I have tonnes of experience in events and marketing for both on and off campus events, which has given me lots of skills from teamwork to time management and I feel like I could really help steer RAD in a great direction that would benefit anyone involved.

Ideas for the future:

- **Supporting Students putting on charity events:**
 - Societies & students who are putting on charity events should be working with RAD to help make their events bigger and better so we can raise even more money!
- **Raising RAD's profile in the student community**
 - Create a dedicated team for RAD's marketing, our facebook page has a huge number of likes, and it could be increased even more if the pages are managed and updated more often
 - Have a bigger presence during freshers, at more events e.g. festifal, presidents big quiz, stannary events, etc.
 - Addition of Society Slam Down quiz to FXU's annual calendar as an official RAD stannary event
- **Challenges**
 - Many teams are lots of random people who don't know each other put together and raising money separately is difficult
 - Creating team building workshops that encourage the challenge teams to work together as well a brainstorm ways to raise money together and separately
- **Spreading responsibility for event organising within committee**
 - Having specific teams that organise the events with more specific roles so that responsibility is shared and clear
- **Work with art course leaders to work on how we can get art students helping create promotional materials in a way that benefits both RAD and the students.**
- **Having a set weekly meeting time**
